Dear Dr. Giron,

I came to you with excellent recommendations and a lot of problems. I had not had proper dental care in years and now needed a lot of help. You performed an extensive check up of my condition and proceeded to do extractions, periodontal disease removal, bone grafts, molds and plates. All of the work was done very satisfactorily and with the minimum amount of pain that would be expected. Follow-up visits have taken care of minor soreness and fitting.

I have received a number of compliments on the appearance of my teeth. The next step will be to have titanium posts installed to anchor the plates and give me greater biting and chewing capabilities.

I want to thank you and your staff for the excellent dental care you have been providing to me. I appreciate the professionalism and caring that has been apparent throughout the procedures that you have had to perform. Your level of knowledge and expertise has exceeded my expectations. I feel very comfortable recommending you to anyone who needs quality dental work.

Many thanks to you and your staff.

Sincerely yours,

Jim Secor
